MEDICAS THERMAL CAMERA

by Workswell s.r.o.

PRODUCT DESCRIPTION:

The thermal camera for non-contact surface body temperature screening allows to perform measurement simultaneously on a larger number of people. This mobile, easily portable device equipped for real-time analysis is ready to use just by connecting a monitor and a keyboard. The system provides high accuracy of temperature measurement +/- 0.3° C and a temperature sensitivity of 30mK. MEDICAS is an ideal solution for the detection of infectious diseases manifested by fever.

COMPANY PROFILE:

Workswell is a design and manufacturing company focused on non-contact temperature measurement cameras, systems and solutions, as well as optical gas imaging systems. The company cooperates with renowned partners from various industries, p. ex. BMW, Renault, Bosch, Honeywell, Tesco, Heineken or IKEA, but also with universities and research institutions.

- simultaneous temperature measurement for places with high human traffic
- production capacity: 100 pcs per month
