PROTECTIVE FACE SHIELD SP28

by OKULA Nýrsko a.s.

PRODUCT DESCRIPTION:

The certified protective shield made of polycarbonate is intended for professionals in medical facilities, security forces and industry workers. The shield provides mechanical protection against particles and droplets, making it a suitable accessory for work in the first line and in environments with an increased risk of contamination. The shield's adjustable head cross carrier guarantees better user comfort and the ergonomic shape allows combination with corrective glasses.

COMPANY PROFILE:

OKULA is a manufacturer of plastic technical moldings for the electrical, automotive and pharmaceutical industries. It cooperates with renowned companies such as Volkswagen, BMW, Volvo, Zentiva or Bosch. In its portfolio, OKULA also offers safety goggles with indirect ventilation, another suitable protection against Covid-19.
