# RESPIRATOR BREASAFE

## by PARDAM, s.r.o.

**PRODUCT DESCRIPTION:**

An antibacterial, valveless, reusable respirator with FFP3 protection level and long lifespan. The product is suitable for workers in areas with an increased risk of contamination. The four-layer functional material with nanofibers is laminated only by heat and pressure, without the use of harmful, non-ecological glues. This also ensures an excellent breathability during respiration, even during physically demanding activities. The respirator is ergonomically shaped for a high comfort and maximum protection. It is resistant to mechanical damage and moisture.

**COMPANY PROFILE:**

PARDAM focuses on the development and production of nanofibrous materials and their use for industrial applications.

- FFP3 standard for the highest level of protection
- unique valveless system for a long lifespan
- made with nanofibers and without glues
