HAND SANITIZER CART

by CT-Products s.r.o.

PRODUCT DESCRIPTION:

The stainless steel hand sanitizer cart is a reliable means of maintaining hygiene even in highly frequented areas. The product is suitable for hospitals and medical facilities, offices and industrial premises. The foot-operated dosing pedal eliminates the possibility of contamination by hands.
The integrated tank holds up to 20 litres of liquid disinfectant. The cart is equipped with a drip tray and has minimal maintenance requirements.
The product is fully mobile and does not require installation.

COMPANY PROFILE:

CT-Products focuses on the production of engineering units, welded steel structures and customized small-batch production. The company is a supplier of stainless-steel products for the food, chemical and medical industries.

- production capacity: 200 pcs per month
