BATTERIES

# TESLA BATTERIES a.s.

TESLA BATTERIES a.s. is a producer and distributor of batteries for portable appliances for everyday use .

The use is wide – from household, administration and electro-technical appliances to medical equipment.

There are lithium, alkaline and zinc-carbon batteries available as well as rechargeable NiMH long-life accumulators.

# TESLA BATTERIES a.s.

Batteries of all commonly used sizes are manufactured under Tesla Batteries brand name. Our products cover virtually all possible uses of batteries for electrical devices.

Most types of batteries are manufactured in several sizes for all individual product lines e.g. a rechargeable line or special line of long-life batteries.

# NIKOLA TESLA

Born in 1856, Smiljan, former Austrian Empire, nowadays Croatia. Croatian-Serbian inventor, physicist and constructor of electrical machines, devices and equipment, living in America for a long time.

His inventions are also:

- Asynchronous engine
- A modern system of distribution and multiphase alternating current usage
- Wireless communication

After the victory in so called “war of currents” against Thomas A. Edison he was generally respected as one of the most significant american electrotechnical engineers. His work laid the foundations to the modern electrical engineering and many of his inventions had a fundamental importance for the future.

# NIKOLA TESLA

In 1880 he studied on Charles University in Prague.

In 1936 Tesla was awarded the Honorary Degree of a Doctor of Technical Studies at the Czech Technical University in Prague.

In 1937 he obtained an honorary doctorate at the Technical University in Brno.

On July 10 1937, on Tesla's 81 birthday celebration he was rewarded by the Czech Ambassador with the Order of White Lion I.

Nikola Tesla died in 1943 in New York.

# HISTORY OF TESLA BRAND

In 1921, the first electrical engineering company in Czechoslovakia was founded under the name Elektra. This company was the basis of the later established state enterprise TESLA.

Between 1932 and 1945, Elektra was part of Philips.

In 1946, the national company TESLA was established by nationalizing and merging 16 independent companies. The company was named in honor of the well-known electrical inventor Nikola Tesla.

In 1990, all parts of TESLA were privatized.

Tesla Motors Inc. was founded in 2003 as an American company producing electric cars and solar energy equipment.

# HISTORY OF TESLA BRAND

After a series of measures, Tesla a.s. against Tesla Motors Inc. the Agreement on Coexistence of Brands is concluded between Tesla Holding a.s. and Tesla Motors Inc. on October 6, 2010.

This document authorizes the signatories to use the TESLA trademark and regulates the relationship between them.

TESLA BATTERIES a.s. was founded in 2015.

FUTURE BATTERIES

# GOLD+ PRODUCT LINE

The GOLD+ line is our highest alkaline battery line, developed specifically for energy-intensive devices, such as cameras and camera flashes. This line provides the highest performance over a long period.

- ★ extremely high energy
- ★ long-lasting life

# GOLD+ PRODUCT LINE

# GOLD+ PRODUCT LINE

# SILVER+ PRODUCT LINE

The SILVER+ line comprises of alkaline batteries designed for devices with high long-term energy consumption. It is an ideal solution for electronic toys. This line is defined by long battery life at a stable energy load.

- ★ high energy
- ★ long-lasting life

# SILVER+ PRODUCT LINE

# TOYS+ PRODUCT LINE

TOYS + is a range of alkaline batteries developed especially for the needs of our children. Most electronic toys today require large power consumption over a long period of time.

These batteries will not disappoint your child.

## PRODUCT LINE

# BLACK+ PRODUCT LINE

The BLACK+ line is 3rd alkaline batteries in TESLA portfolio. It's a basic alkaline battery designed for low-drain devices. Offering very good value for money. It is an ideal solution for electronic devices like keyboards, PC mice and more other.

- ★ high energy
- ★ long-lasting life

# BLACK+

## PRODUCT LINE

# BLUE+ PRODUCT LINE

The BLUE+ line represents zinc-carbon batteries with basic performance. These batteries are suitable mainly for devices with low short-term energy consumption, e.g. TV remote controls or wall clocks.

- ★ great price-performance ratio
- ★ affordable price
- ★ standard life

# BLUE+ PRODUCT LINE

# BLUE+ PRODUCT LINE

# RECHARGEABLE+ PRODUCT LINE

Tesla RECHARGEABLE+ batteries are top-class long-life NiMH accumulators. Use of advanced technology guarantees a low self-discharge rate and long life – at least 1000 charge cycles. All batteries come charged and can be used immediately after unpacking. They are suitable for all household appliances.

- ★ high quality
- ★ ecological and economical solution
- ★ environmentally friendly

# RECHARGEABLE+ PRODUCT LINE

# SPECIAL CYLINDRICAL BATTERIES

These special alkaline and lithium batteries have been developed particularly for use in complex devices, such as still and video cameras, audio-visual and/or medical equipment.

# BUTTON CELL BATTERIES

We produce three types of button cell batteries; silver-oxide, alkaline and lithium. They are designed for small electronic devices, such as watches, calculators, backup backlights, remote controls, blood pressure monitors and car alarms.

# HEARING AID BATTERIES

This specific line of zinc-air batteries is tailored for use in medical equipment, especially hearing aids, audiological equipment, and other cochlear devices. Batteries are activated by exposure to oxygen, within 60 seconds after their protective sticker is removed. The batteries meet strict health safety requirements and they are environment friendly.
