

FMB care SOLUTIONS

Improve life and work in care sector

”

The market has changed. It is now much more global, more challenging. But this transformation does not mean that our focus has changed. For us the human aspect of our work still steadfastly remains the top priority. So our task is quite unequivocal: the nurturing of innovative ideas and the creating of supreme products to make life easier and to improve its quality for everyone requiring care and for all those providing such care. The result is that we have succeeded in presenting a care bed which is easy to operate and which offers a unique degree of comfort with a modern look that provides more cosiness. And into the bargain this bed is also amazingly cost-effective.

Martin Ferber, CEO, FMB care

SIMPLY UNIQUE

Care beds Formidabel

- A modular concept – absolutely unique - variable
- The side protection Unique – Freedom with safety
- The side protection Solid Up – The extra strong solution
- Szenario-Handset – Solutions with buttons
- Bed extension with no tools required – longer and so much better
- UltraLow – safe proximity to the floor
- Sustainability – certified quality

 FMB innovations
that shape the care sector!

get the care bed that you really need, the bed that will actively assist the caring work in your particular establishment. No compromises, totally versatile, absolutely innovative. In other words, simply Formidabel - impressive and inspirational.

With the extensive selection of shapes and colours at our fingertips, together with you we can design every Formidabel care bed to be completely in tune with your taste and your decor.

As well as our extensive range of ultra modern wood decor, we also have textile fabrics and upholstered headboards and footboards in low-maintenance fabrics – with no compromises regarding their use or function. All this provides countless creative options and ideas. The result is a cosy picture of homeliness felt by one and all.

- + Especially cost-effective
- + Unique and easy configuration
- + Powerful combinations
- + Solutions for more freedom
- + Always suitably equipped
- + Choice of different motor systems, like T17 for safe working load 275 kg

SIDE PROTECTION UNIQUE

Freedom with safety

Panels

For models which need no side protection or safety rail system

Part protection

At the head end with two side protection elements for mobility and safety

Full protection

Provided by four side protection elements placed along the entire length of the bed

+ Advantages

- + Modular structure and consequently particularly cost-effective
- + No tools needed and easy to use
- + Innovative net structure provides more safety
- + Quick and easy cleaning
- + Maximum feeling of freedom for the user of the bed

The Unique side protection system marries together maximum freedom, the greatest possible safety and luxurious comfort. The single elements are meticulously aligned with one another so as to enable countless combination options suitable for every situation and for every kind of requirement. Every Unique element can be mounted in exactly the place where it is really needed. And this can be done with just a few moves of the hand. No tools whatsoever are required. Offering complete protection provided by four side protection elements, which can also be fixed just at the head end of the bed, the Unique side protection system with its transparent,

pleasant and easy-to-clean mesh fabric gives users of the bed a particular feeling of freedom and wellbeing and also prevents any risk of injury caused by limbs being jammed. And thanks to its infinitely variable setting and its high level of stability, the protection element serves as a pleasant and safe aid for getting up out of bed and as a mobility aid. Drawn up to its maximum height, it can also function as a cognitive signal warning of the risk of falling out of bed or it can provide full protection against this. This variety of possibilities is what makes Unique live up to its name: it is so simply so unique in the world of care.

SIDE PROTECTION SOLID UP

The extra strong solution

+ Advantages

- + Extra strong divided side protection
- + Modular structure and consequently particularly cost-effective
- + No tools needed and easy to use
- + 40:60 division excellently facilitates getting into and out of the bed
- + Quick and easy cleaning
- + Feeling of freedom for the user of the bed

The side protection Solid Up ideally complements the product family of FMB care. Like Unique, Solid Up also offers - unlike conventional side guards - solutions that are tool-free and variable in just a few steps, if required. Depending on the care situation, the elements can be attached to the bed in different combinations. As side panels, if no side guard is needed, or as side guard elements for residents in need of special protection. A side guard attached on the head side supports entry and exit due to the asymmetrical 40:60 division of the elements and thus offers additional safety. The maximum stability and flexibility of the Solid Up guarantee suitable, sustainable and budget-friendly solutions.

SIDE PROTECTION SOLID

Proven optimised

+ Advantages

- + 40:60 division excellently facilitates getting into and out of the bed
- + Easy to handle
- + Safety as an aid for patients to rise
- + Quick and easy cleaning
- + Stability

In order to allow carers to react flexibly, swiftly and with the appropriate respect when protecting their residents and patients, our Solid side protection has a solution that meets such demands. It has been designed in such a way that its asymmetrical 40:60 division excellently facilitates getting into and out of the bed while at the same time offering the greatest possible safety as an aid for patients to rise. Because of all the various settings and possible adjustments, Solid guarantees stability and functionality when and where these are required.

SZENARIO-HANDSET

Solutions with buttons

Good solutions operate smoothly. The Scenario handset makes the daily routine of residents and carers as easy as humanly possible: just by pressing a button. Easy-to-understand symbols help the resident to intuitively have control over everyday situations just by pressing a button: scenarios such as finding a comfortable position to relax, a sleeping position or achieving the right height for the bed in order to get up easily and safely.

The result is a very real potential lightening of the workload for carers. And for those needing care, it means more independence and consequently a higher level of social integration. In addition to the programmable resident's mode, the configurable care mode and the lockdown mode work together to create a safe operating of the device. In short: we are talking more quality of life and more enjoyment at work.

+ Advantages

- + Programmable scenarios for more independence
- + Easy-to-understand symbols for intuitive operating
- + Button illumination provides excellent orientation even when it is dark
- + Functions can be selected and then blocked
- + Significant lightening of staff workload
- + Optional: Scenario handset T16/T17

BED EXTENSION WITH NO TOOLS REQUIRED

Longer and so much better

2,00 2,10 2,20

Every care home resident or hospital patient is different. So it is all the more important that a care bed can be flexibly adapted to suit the prevailing needs and conditions. And that has to happen with very little effort. The way in which the bed length of Formidabel First and UltraLow can be extended without the need for any tools is the perfect example of how good solutions can also be very simple.

Just a few quick moves is all that it takes

It is vital that a care bed can be adapted swiftly and in a straightforward manner to suit the height of each resident or individual patient. Thanks to the integrated bed extension feature, which comes

as a standard fitting, all our Formidabel models can be easily extended. With the First and UltraLow models that are available with the Unique side protection, the bed extension, carried out without the need for any tools, leads to even more flexibility and saves a great deal of time, too. By means of a practical release mechanism, these models can be quickly extended from 2 meter in length to 2.10 meter or even up to 2.20 meter. In this way it is possible to react at short notice if beds are to be used for different residents or patients with the result that the new “inhabitant” of the bed can be given the greatest comfort immediately.

+ Advantages

- + Extendible to 220 cm
– pure simplicity and no in-house technical work required
- + No tools needed, just a few moves of the hand do the job
- + Efficient procedures when bed becomes occupied by a new resident or patient

FORMIDABEL ULTRALOW

Safety proximity to the floor

Our UltraLow is the latest building block in the Formidabel series. This is where you will find all cutting-edge solutions and functions brought together in order to create the greatest sense of wellbeing possible for the care home resident. When the relevant handset scenario option is selected, the bed's lying surface is lowered to a height of just 15 cm away from the floor. Thus, UltraLow becomes instrumental in reducing consequences of any possible fall suffered by the resident. Furthermore, residents find it easier to get their bearings in the room, especially at night, because they can touch the floor with their hands and in this way feel much more confident of their position.

An ideal combination

The protection offered by the Unique side safety system is the ideal complement to the lowest lying position. On account of its infinitely variable adjustability, the side safety system serves as a safe aid for getting up out of bed or its handrail at mattress level can function as a cognitive signal warning of the risk of falling out of bed.

+ Advantages

- + Specific fall prevention by setting the lowest bed position
- + Unparalleled combination made up out of 15 cm proximity to the floor & the Unique side protection feature
- + Integrated fittings and planning reliability in every position

SUSTAINABILITY

Certified

quality

BERLIN CERT

When it comes to the quality of our care beds, we tolerate absolutely no compromises: so as to ensure safety for the users of our beds, we observe all current regulations stipulated for management systems and products found in the field of medical technology. Independent testing and certification laboratories document our adherence to all requirements and verify our high-quality standards.

ISO 13485:2016

This standard attests to comprehensive quality management, representing the design and manufacturing of medical products. The certification obtained in the summer of 2021 states that our customers can rest assured that our care furniture and also the product innovations meet the highest requirements and that our good quality remains constant.

ÖKO-PROFIT

FMB care produces care beds completely in tune with the guidelines of Ökoprofit, a German ecological and financial undertaking: aiming at the reduction of operating costs while at the same time conserving natural resources. Our company has been awarded distinctions by the government ministry for our collaboration on sustainable projects focusing on photovoltaic systems, charging stations and on the conversion to LED lighting. FMB care continues to actively commit to environmental protection throughout the company.

+ Advantages

- + Fulfilment of all requirements of medical technology
- + comprehensive quality management
- + environmental protection

SHAPING THE FUTURE

Together we can achieve more

”

Because of the values that we nurture as a family-run company, here at FMB care we attach huge importance to being your longterm, reliable partner who stands at your side on an equal footing. It is always very close to our heart that we are able to support your work in the care sector with the best possible offers and solutions. We are utterly convinced that sustainability and a sense of responsibility are inextricably linked. And that is why we promise to link up with our partners in a long-lasting and sustainable way. A promise that embraces our wish to shape the future together in the best possible way.
