## ABOUT US

Green Center s.r.o. is a leading Czech technology company with more than 30 years of experience. We focus on developing and delivering intelligent systems for access control and process automation. Thanks to our own R&D, flexibility, and focus on quality, we now operate in 27 countries across 4 continents. Our priority is to provide innovative, tailor-made solutions and first-class service – built on expertise, trust, and technological progress. We are a trusted partner for cities, institutions, and private operators.

## COMPANY MISSION

Our mission is to deliver smart, high-quality, and sustainable solutions that meet our customers' needs while increasing efficiency and reliability of operation. We believe quality starts with attention to detail – from thoughtful functionality to professional service you can rely on. Every project is built on open communication, technological excellence, and trust, forming the foundation of long-term partnerships. This way, we create lasting value and bring solutions that work today and tomorrow.

Communication**

**Installations  
In 27 Countries**

**Reliable,  
Helpful, Quick**

## RETURN ON INVESTMENT

**The return on investment of an installation ranges from 4 to 6 months.**

## The Mission of Turnstiles / Why Turnstiles?

Turnstiles represent an innovative technological solution that significantly enhances control over operations. Implementing a turnstile system increases safety, ensures higher hygiene standards, and optimizes operating costs – both for equipment maintenance and staff. A major benefit is also its positive impact on the environment – the system supports paper savings, reduces electricity consumption, and contributes to more efficient water management.

**Operating costs can be reduced by up to 50 %**

## KEY BENEFITS OF TURNSTILE IMPLEMENTATION

- Safety
- Design
- Cleanliness
- Financial efficiency
- Access regulation
- Control
- Reduced operating costs
- Fast return on investment
- Environmental benefit

## TYPES OF TURNSTILES

### Speedgate

GP4SGP is a combination of a bidirectional speedgate and an automatic payment station. It can operate fully autonomously or be integrated into the parking and remote monitoring system.

### Tripod With Payment Station

GP4AT combines a bidirectional tripod turnstile and an automatic payment station. It can operate fully autonomously or be integrated into the parking and remote monitoring system.

### Compact Payment Station

GP4AM is a compact automatic payment station with the option of integration into a remote monitoring system. It allows passage based on payment with EUR coins, payment card, or tokens.

### Access Unit

GP4A is an access unit fully integrated into the parking system. Entry can be made using a parking ticket or another medium.

## WHAT OUR CUSTOMERS SAY

*"The investment in Green Center turnstiles was one of our best operational decisions in recent years. We solved a long-standing issue with cleanliness and restroom overload, which visitors immediately appreciated. The savings on staff and maintenance mean the investment is paying back very quickly. I'd also highlight the implementation itself – the whole process was fast, and communication with the team completely seamless."*

**Dušan Rusó, Fontána Teplice  
(Regional Shopping Center)**

*"I was a bit worried at first about how the turnstiles would fit into our interior, but the result completely exceeded my expectations. They look modern, work perfectly, and the operation is now much smoother. Visitors accepted them naturally. It was a great choice, and I can fully recommend Green Center – from the first contact, it was clear we were dealing with real professionals."*

**Alena Mařáňová, OC Galerie Harfa  
(Major Prague Shopping Center)**
