

# CONNECT GROUP

Beyond EMS. Your Integrated Manufacturing Partner.

Defence & Aerospace

AGILE.  
FLEXIBLE.  
EFFICIENT.

CONNECTRONICS s.r.o.

# A LEADING EMS PARTNER WITH STRONG EUROPEAN FOUNDATION AND GLOBAL REACH

- **Top 20** EMS in Europe
- **>2,700** employees
- **>96,000 sqm** manufacturing space
- **40 years** of experience
- **Sustainability** at our core.  
Carbon neutral in 2035.

What sets  
us apart:

A dark blue square with a subtle pattern of white lines and dots, resembling a network or data flow.

**Vertical integration**  
for tailored,  
end-to-end solutions.

A dark blue square with a subtle pattern of white lines and dots, resembling a network or data flow.

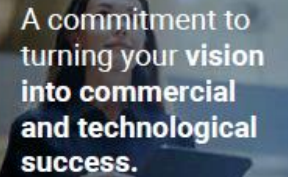

**State-of-the-art  
infrastructure**  
with AI, Cloud, and  
Cybersecurity at the  
core of a secure,  
future-ready supply  
chain.

A dark blue square with a subtle pattern of white lines and dots, resembling a network or data flow.

**Full transparency  
and traceability**  
throughout  
the production  
lifecycle.

A dark blue square with a subtle pattern of white lines and dots, resembling a network or data flow.

**Global presence**  
across Europe,  
Asia, and America  
for faster response  
times and localized  
flexible service.

A commitment to  
turning your **vision**  
into **commercial**  
and **technological**  
**success.**

## Specialized in high-requirement sectors:

- Defence & Aerospace
- Railway
- Healthcare
- Automotive & Off-Road
- Infrastructure (Energy / IoT / Electrification)
- Industry

## Certifications:

- AS 9100D (Defence & Aerospace)
- ISO 9001 (Quality)
- ISO 14001 (Environmental)
- ISO 27001 (Information Security)
- ISO 13485 (Medical)
- J-QMS (Japan Medical Standard)
- ISO/TS 22163, EN 15085-2, EN 17460 (Railway)
- IATF 16949 (Automotive)

## YOUR ONE-STOP PARTNER FOR HIGH-VALUE TECHNOLOGY SOLUTIONS

We go beyond standard EMS, offering fully integrated services under one roof:

### FULL VALUE CHAIN CAPABILITIES:

- **Design & Development:** From early-stage validation to product innovation, built to specifications.
- **Rapid Prototyping:** Turning ideas into functional models faster.
- **New Product Introduction (NPI):** Ensuring reliable and scalable production.
- **PCBA & System Manufacturing:** Advanced assembly for complex, high-reliability systems.
- **Cable & Wire Harness Assembly:** Military-grade, robust wiring solutions.
- **System Integration & Mechatronics:** Complete, deployment-ready assemblies.
- **Testing & Qualification:** Functional, environmental & compliance testing to quality standards.
- **Lifecycle & Obsolescence Management:** Maximizing product longevity and minimizing disruption.

Connect Group contributed to the successful Ariane 6 space launch.

- Sub modules for radar systems.
- Sensor & camera systems for drones.
- Missil control units.
- Electronics for tactical & secure communications.
- Avionics and aerospace instrumentation.
- Electronics for avionic and rugged display systems.
- Surveillance, detection & control systems.
- Electronics for optical instruments and night vision systems.
- Rugged power and interface modules.
- Harnesses for various military applications.
- Fiber optic interconnects for military-grade signal distribution.
