Why collaborate with MECAWEL?

1

Long-standing Tradition and Trustworthiness

For over 32 years, companies of European and global significance have relied on our manufacturing outsourcing services. We help our partners grow while they focus on their core activities.

2

Quality and Production Flexibility

-  We offer products ranging from a few millimeters to several meters in size.
-  We guarantee high precision – dimensional tolerances of IT5–IT7 are our standard.
-  We adapt to your needs – from single-piece production to thousands of units.
-  Short delivery times thanks to precise supply chain management.
-  Logistics solutions include sustainable packaging and the option for delivery directly to your assembly line.

3

Comprehensive Custom Solutions

From sourcing and manufacturing components to assembly, packaging, and delivery – we take full responsibility for your project. You can focus on your strategic goals while we ensure smooth production.

4

Modern and Sustainable Manufacturing

In our new production facility, we use modern technologies: a 710 kWp photovoltaic power plant, heat pumps for heating and cooling, and systems for rainwater retention and reuse.

5

Collaboration with a Reliable Partner

Manufacturers of machinery and equipment for industries such as engineering, woodworking, healthcare, printing, and food production have long valued our expertise, flexibility, and ability to meet commitments. Join them and gain a strong partner for your growth!
