

Electroporcelán a.s.
Headquartered in Central Europe,
the Czech Republic

Electroporcelán a.s. is based in Prague, the capital of the Czech Republic, with technical facilities, warehouses, and dispatch operations located in the town of Louny, near Prague. We specialize in the production and final assembly of porcelain insulators, the supply of composite insulators, samples tests and special testing. Additionally, we provide lattice towers for electrical transmission lines.

OUR MAIN PRODUCTS AND SERVICES

Ceramic Materials

Our products are made from materials compliant with IEC 672-3, specifically subgroups C110, C120, and C130, ensuring durability and high performance.

Glazing Options

We offer a selection of glaze colors, primarily in white, gray, and brown.

Insulator Testing

We conduct thorough testing of ceramic and polymer insulators in accordance with international IEC standards (137, 60168, 62155, 60383, and 61109), ensuring each product meets the highest quality and safety requirements.

We also offer extensive warehouse spaces for rent in our campus.
