

Precision Metal Solutions for Demanding Industries

NADE IN SHORT

ABOUT US

NADE is a Czech family-owned engineering company with more than 30 years of experience. We specialize in the development, design and production of battery boxes, enclosures, and complex metal components for rail vehicles (trains, trams, metro) as other demanding industries. Our portfolio covers both high-value prototypes and serial production, supported by a wide range of in-house technologies. Trusted partner for leading manufacturers and operators across Europe.

OUR OFFER

- **Processing of Hardox, aluminium & stainless steel**

Precision cutting, forming, machining and welding for demanding applications in rail, heavy industry and defence.

- **Prototypes with high added value**

Design, engineering support and material consulting – even from incomplete documentation

- **Serial production of parts & assemblies**

Machined and welded components, cut shapes, frames and complete assemblies – from small batches to large-scale production.

- **Enclosures, frames & complex components**

Custom enclosures and cabinets for various systems, structural frames, and other precision-engineered parts

TECHNOLOGIES & CERTIFICATIONS

- CNC laser cutting, machining, welding (incl. robotized)
- Certifications: ISO 9001, EN 15085, DIN 6701, ISO 3834

WHY NADE?

- ✅ 30+ years in rail industry
- ✅ References from key market leaders
- ✅ Flexibility: prototypes → serial production
- ✅ Wide range of in-house technologies
- ✅ Proven ISO quality
