

FURNITURE

— *We can make* —
woodever

Our Tradition

Dating back to 1945, DR Furniture represents over 70 years of Bohemian handcraft tradition in manufacturing of prime-quality bespoke furniture. But it takes more than just skilled craftsmen and decades of experience to be able to comply with even the most demanding requests of our clients – that is why we always make sure to use cutting edge technology, both in furniture design and networked machinery.

Our Team

The high quality standard of our production is ensured by 40 experienced professionals working in a modern plant of 45 000 square feet. Our design engineers work with SolidWorks software and our craftsmen take advantage of 60 posts fully equipped for work with woodever.

Our Work

Every piece of furniture we produce is well thought-out and excels in longevity guaranteed above all by our strict quality control and professional on-site assembly.

Our products can be found not only in the Czech Republic but also abroad, ranging from home furnishings to sophisticated interior solutions installed in large office and accommodation facilities.
