BUSINESS MISSION OF LEADING CZECH COMPANIES IN THE FIELD OF ARTIFICIAL INTELLIGENCE AND TECHNOLOGICAL INNOVATION

Citymind solutions

Citymind is a tech startup bringing AI to the cities and companies of the future. Our advanced AI Agents quickly assist with life situations, provide document advice, aid in product selection, and respond to user needs. We have unique know-how within AI technology and use it to maximise process simplification in both the public and commercial sphere, handling up to 80% of queries autonomously. Our agents provide relevant answers, reference sources, supply documents, and offer direct information links. With automated implementation, our AI adapts and learns without requiring training data.

Ideal Business Partner:

— Companies
— Municipalities and public sector institutions
— VCs and investors

Continero & MingleMinds.ai

Continero and MingleMinds.ai are at the forefront of delivering innovative technological solutions. Continero specializes in providing sophisticated software solutions for businesses, including external IT resources and AI integration services that help companies digitalize by incorporating existing AI tools into their operations. MingleMinds.ai offers advanced AI solutions for social media management, automating and optimizing customer communication. Together, we drive innovation with cutting-edge technology solutions that ensure a competitive edge and support the growth of your business

Ideal Business Partner:

— Within AI and software solutions: banks, pharma industry, software companies, manufacturing industry (digitalization)
— For the new application Artima.ai (social content management and creation using AI): currently targeting smaller entrepreneurs or companies who manage their own social networks and want to speed up the process, simplify it and better target customers using AI technologies
— Investors or partners to enter new markets

ECOTEN urban comfort

ECOTEN urban comfort specializes in urban environmental science and engineering services. We work with city planners and urban development stakeholders to help them develop resiliency to extreme heat in cities and urban projects using earth observation and urban microclimate simulation technology. We use these technologies to deliver services to support the cooling of the urban environment through a nature-based urban design approach. Our services are designed to be a decision-making tool for urban design to develop scenarios for effective cooling for cities during extreme heat events.

Ideal Business Partner:

— Research institutes or universities (German Research Center for Artificial Intelligence)
— Tech companies working on smart cities or digital twins or ClimaTech (Dassault System 3DEXPERIENCE – working on digital twin)
— Public sector institutes for urban development (IPR in Prague)
— Space Agency (NASA, ESA etc.)

EmbedIT

EmbedIT is an IT services provider that specializes in delivering transformative digital solutions to businesses looking to scale and innovate. Part of the PPF Group, EmbedIT has over 20 years of experience and a global reach, impacting over 140 million users across various countries. The company offers a wide range of services including enterprise IT transformation, advanced cybersecurity, data analytics, and omnichannel solutions, helping businesses enhance their operational efficiency and customer engagement. Known for its "Forward Manifesto," EmbedIT emphasizes a proactive and collaborative approach, ensuring that their clients can navigate complex IT challenges effectively and advance their business goals rapidly.

Ideal Business Partner:

— Mid-size Bank
— Neo Bank
— Fin Tech
— Collection Companies
— Pension Funds
— Companies dealing with Retail / Consumer Risks

Resistine

Resistine AI CyberSecurity Assistant. How did cyber-attacks become more profitable than the illegal drug trade? Because enterprise-level cybersecurity that supports organizations of all sizes, while being affordable and easy-to-use, doesn't exist. Resistine's AI-driven Cybersecurity Assistant improves security by detecting vulnerabilities and threats, suggesting solutions, offering training to achieve NIS2/DORA compliance. All without constraining budgets, staff, or in-house expertise. Join us in making the world safer and freer. Resist cyber threats with Resistine.

Ideal Business Partner:

— Partners in Germany, all those interested in cyber security
— Especially those affected by the NIS2 and DORA cybersecurity regulations

Retailys.com

Retailys is an advanced information system for omnichannel sales, facilitating seamless expansion into international markets while streamlining business processes. The platform integrates e-commerce websites, online marketplaces, and third-party applications into a single, unified system. Retailys efficiently manages data, including products, orders, and customers. Powered by AI, it automates key tasks, reducing errors and boosting productivity. Retailys gives businesses a competitive edge by enhancing agility, optimising operations, and scaling for domestic and international growth.

Ideal Business Partner:

— E-Commerce companies looking to expand their sales channels and efficiently manage large volumes of data
— Third-party integration partners and service providers who share the vision for innovative and automated solutions in the commerce sector

Scicake

Scicake, founded in 2022, is a data science company focusing on digital health, agriculture, space, and other high-impact areas. We offer comprehensive services – consultations, research, and development – to approach AI issues responsibly and creatively. We are also developing a product in the field of digital health – FONAFIX, an AI-supported system for the diagnosis and therapy of dysarthria. Our competitive advantages lie in our expert team and innovative technologies. We empower your business with cutting-edge solutions and aim to expand into the European market.

Ideal Business Partner:

— New orders – innovative companies, pharma and biotech companies, hospitals
— Partner – reselling for services, stakeholders for healthcare
— Investor – pre-seed, seed

ScrumWare

At Scrumware, we guide clients through the entire project process, from initial discussions to long-term operation. Our approach includes a non-binding consultation to understand your vision and define the solution framework. Within one week, we design and test a prototype with real clients, incorporating their feedback. Finally, we develop and operate the product based on user testing. We specialize in custom software and product development, from design to implementation. Our expertise spans banking, transportation, and more, supporting small and large companies with international reach.

Ideal Business Partner:

— All individuals and organizations seeking solutions to build new products, streamline existing processes, or gain new perspectives on their own products.
— Industrial enterprises
— Consulting companies in direct contact with clients
— Large corporations needing an innovative approach to product development

Semantic Visions

Semantic Visions leverages AI and ML for actionable data analytics. We gather and enhance global OSINT and news, offering early industry insights. Numerous SAP & Deloitte clients rely on us to manage supplier and third-party risks. We aid global firms and national agencies in addressing credit risk, KYC, AML, intelligence, brand management, and ESG compliance challenges. We deliver data-driven insights for investments and M&As. Our AI, trained in 12 languages by native speakers, tracks 10M+ companies. We provide historical data screening and real-time monitoring with flexible commercial terms.

Ideal Business Partner:

— Banks and financial institutions
— Pharmaceutical
— Manufacturing companies
— Consulting firms
— Compliance advisors
— Strategic investors
— Hedge funds and fundamental analysis firms
— Data consulting firms
— Technology firms
