

New era of Security: HxGN dC3 LidarVision

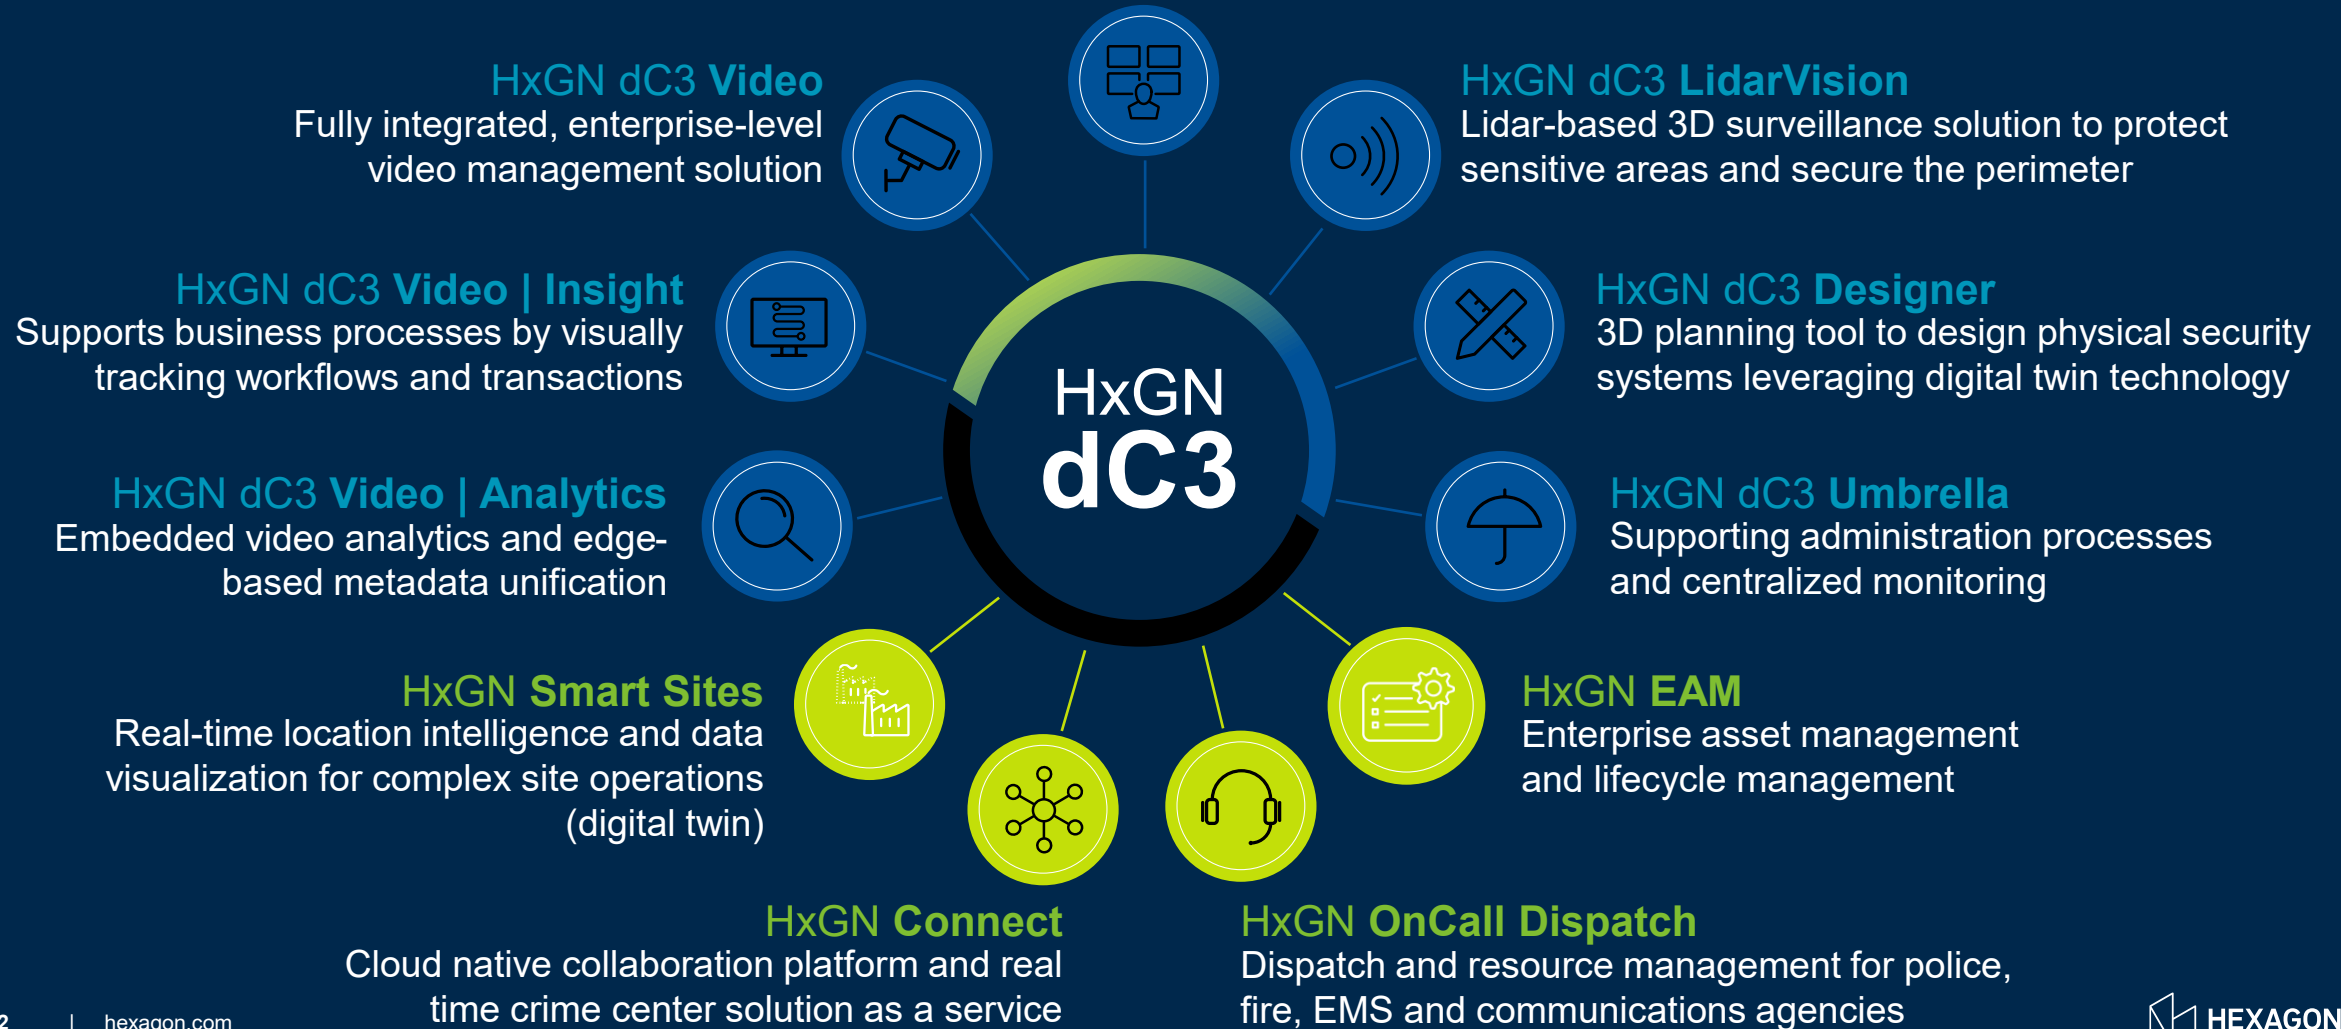

Tacticaware s.r.o.
October 2025

Radek Zachoval, Business Developer EMEA
Jonathan Valero, Channel Sales Manager

Physical security portfolio

HxGN dC3 Orchestrator
“Single pane of glass” for enhanced situational understanding and managing all event-based response

Extended Hexagon portfolio

HxGN dC3 LidarVision

Lidar

Precision volumetric sensing using high-resolution lidar data

Spatial awareness

Real-time understanding of object position, size, and movement

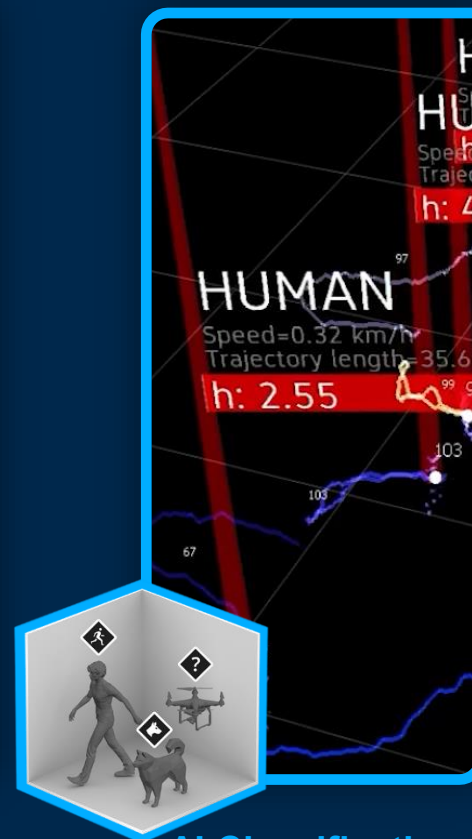

Digital twins

Linking real-world events to their digital representation

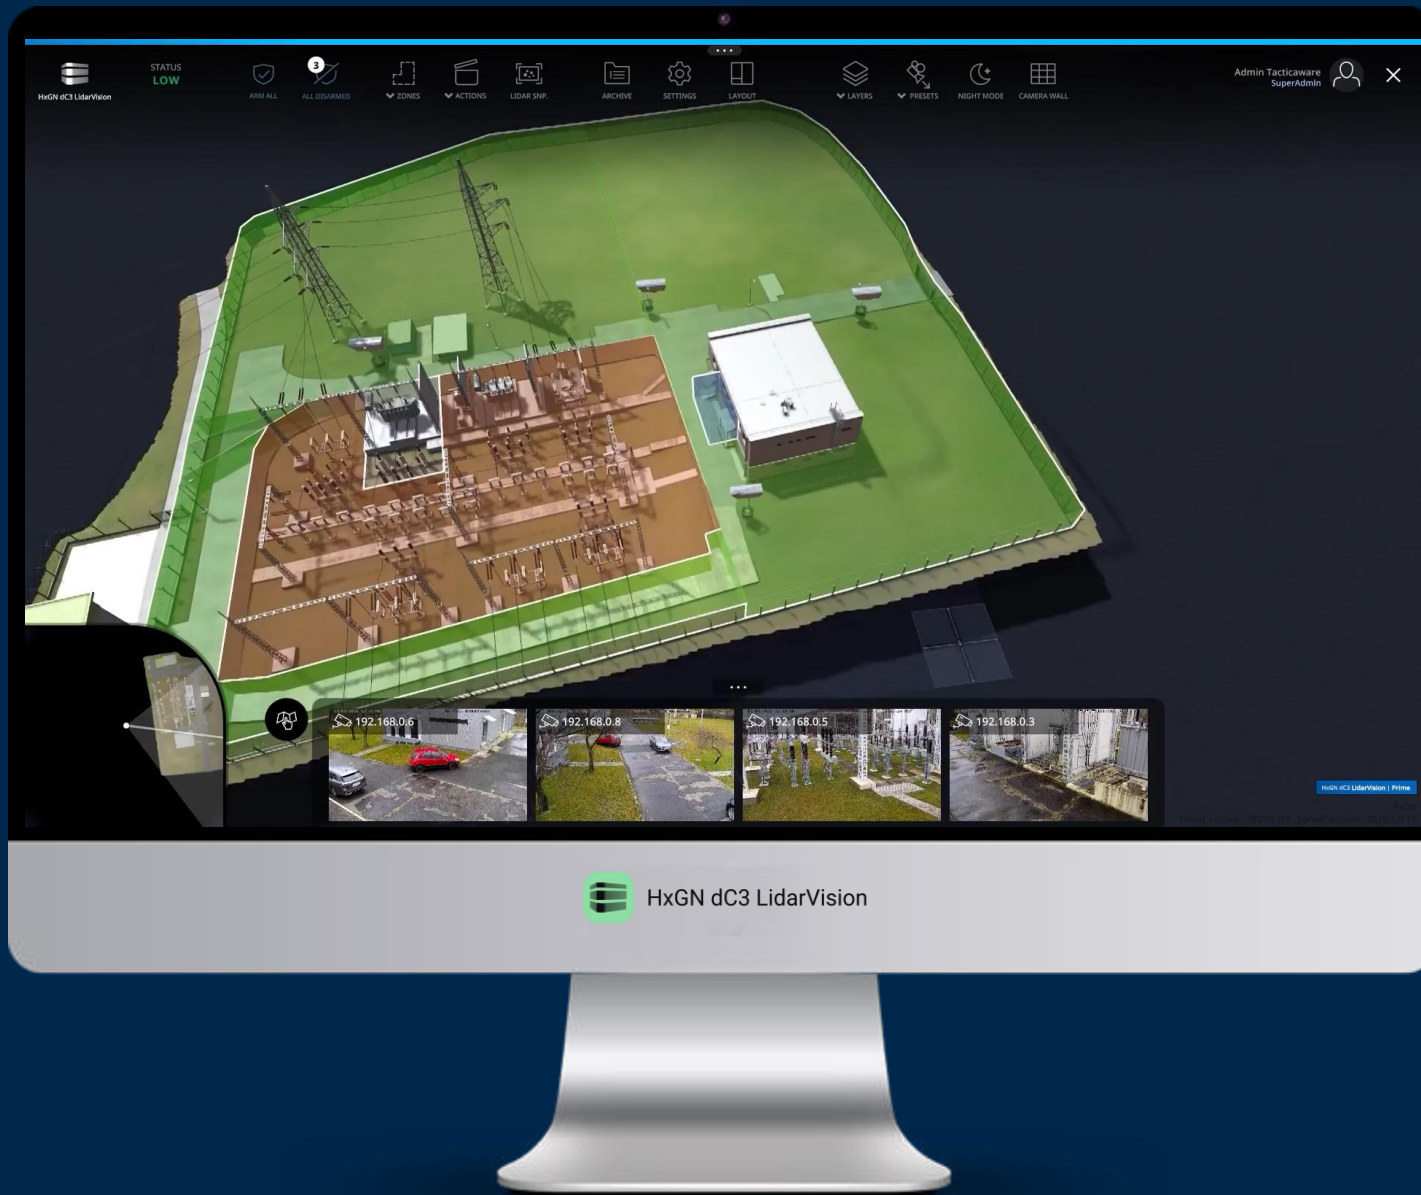

Designer

Precision planning tool for lidar and camera placement

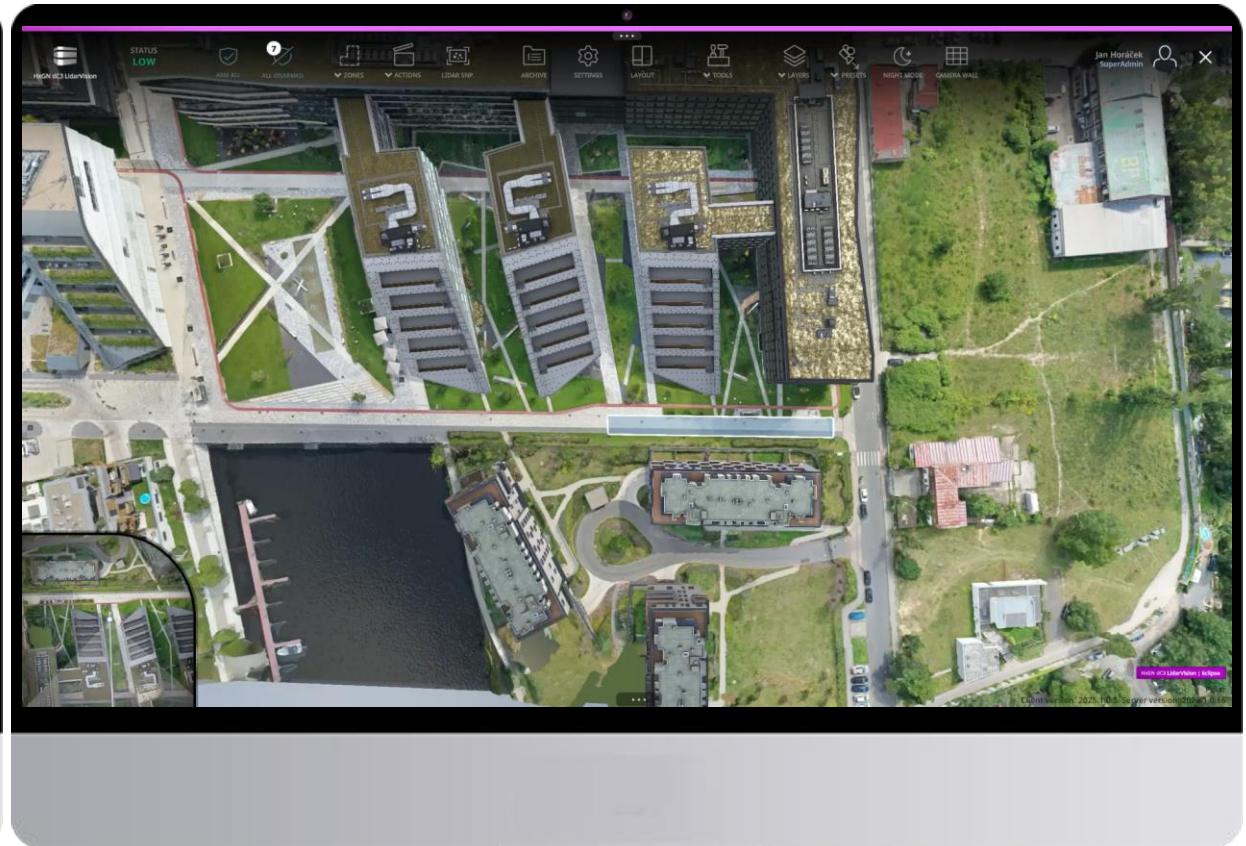

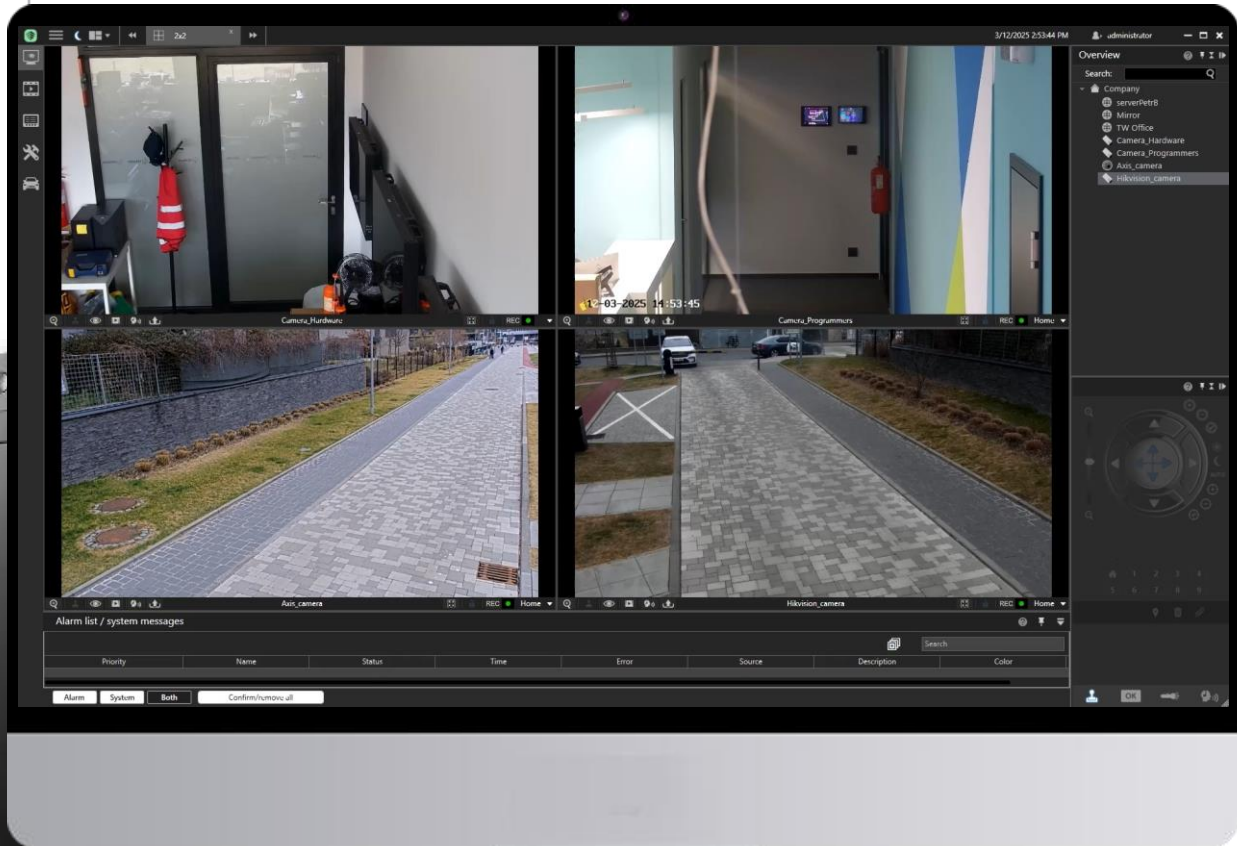

AI Classification

Deep learning classification for smarter intrusion detection

Energy grids

HxGN dC3 LidarVision is deployed to protect vital resources such as water treatment plants, reservoirs, dams, power substations, and power plants, including nuclear facilities. It also secures gas compression stations and other critical infrastructure, ensuring the safety of essential national assets.
