PLANK 100, PLANK 75, PLANK 50 — NATURAL TEXTURED STONEWOOD

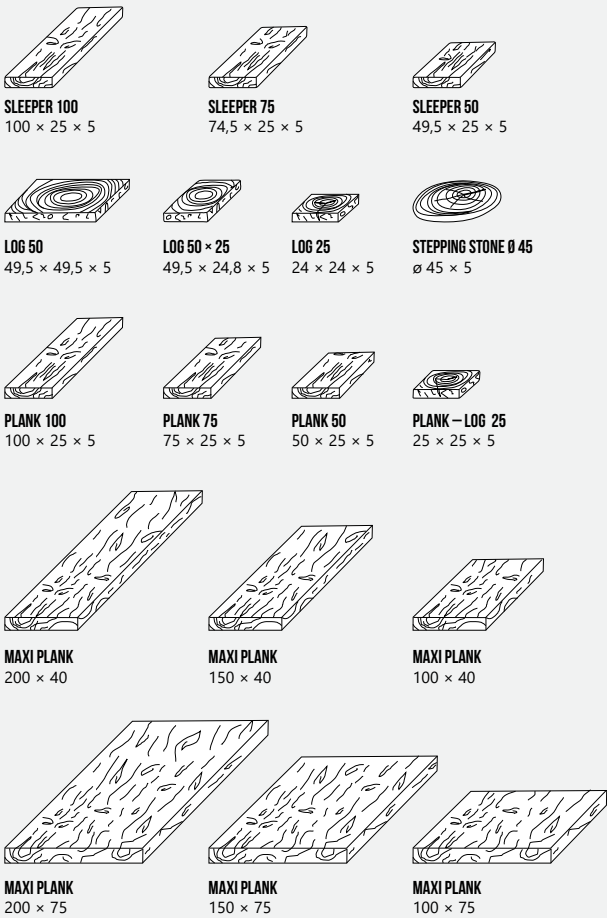

# STONEWOOD PAVERS

NATURALLY  
TEXTURED  
STONEWOOD

The paving system in the STONEWOOD group offers a wide portfolio of elements, allowing for an unparalleled variety of combinations of planks and logs, as well as a range of Maxi Planks for constructing walkways, paths, and seating areas around houses and gardens. It also fits perfectly in public areas such as parks and gardens, blending seamlessly into the natural environment. The new Paving Plank series complements the existing STONEWOOD range. It features pavement with minimal joint and straight edges, ideal for seating areas, terraces, and patios.

# STONEWOOD PALISADES AND EDGES

NATURALLY  
TEXTURED  
STONEWOOD

The wide range of palisade systems in the STONEWOOD group is impressive, allowing solutions for both small terrain differences and high terraces with large static loads. Edgings and grass edges stylishly complete both the end of paved areas and paths in the STONEWOOD system and can also be used to separate individual flowerbeds from grassed areas.

# STONEWOOD STEPS

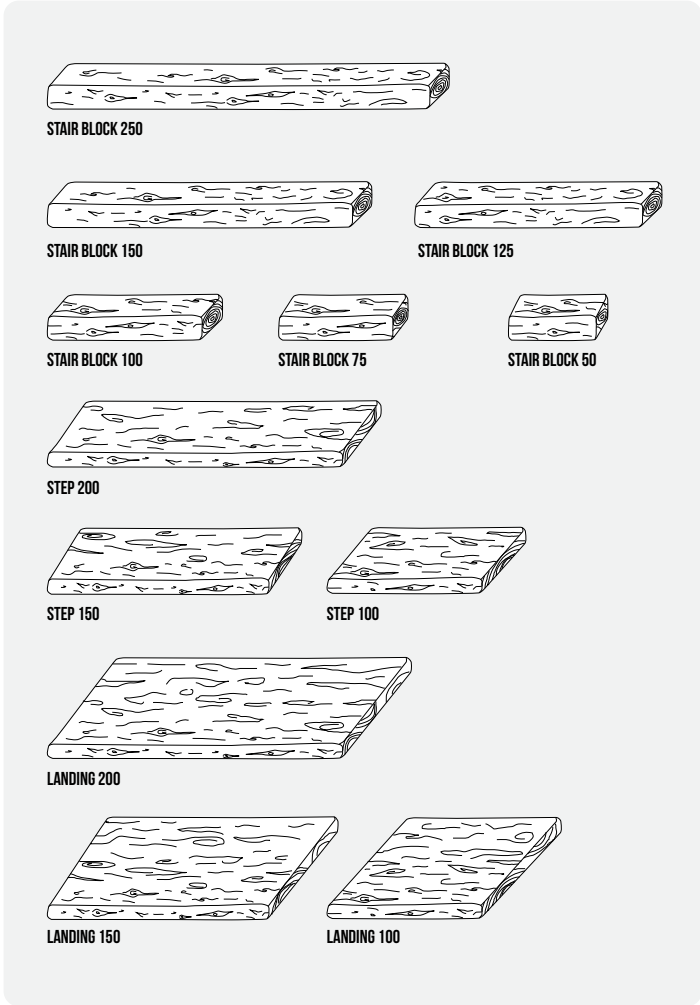

NATURALLY  
TEXTURED  
STONEWOOD

Stair blocks, steps and landings are excellent elements for addressing terrain irregularities in sidewalks, paths, and surfaces. Stair blocks, combined with Planks and Logs, can accommodate any angle of stairs within the given terrain.

Steps and landings, combined with a lightweight metal structure, create a complete original staircase assembly in a non-slip natural design, available in three different widths.

# STONEWOOD RAISED BEDS

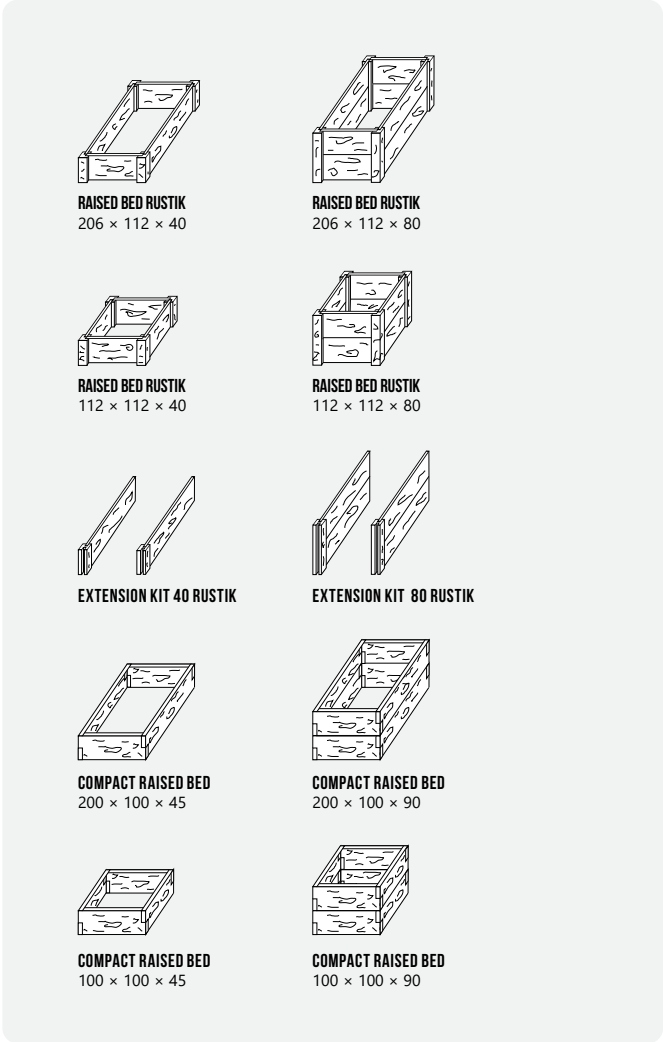

NATURALLY  
TEXTURED  
STONEWOOD

Raised beds are a useful feature for any garden where reaching the ground is difficult. Whether the raised beds are planted with ornamental flowers or shrubs, functioning as large planters, or with vegetables, their unique STONEWOOD design makes them a beautiful, natural addition to your garden with an indefinite lifespan compared to original wood. The new Compact raised bed, with its simple and quick assembly and robust construction, is the most popular option in its market segment, making caring for your crops a breeze.

# STONEWOOD FENCING SYSTEM

NATURALLY  
TEXTURED  
STONEWOOD

The STONEWOOD fencing system allows you to build fences in various heights with a beautiful natural design. Each panel is produced in ten different designs, always in an original combination of brown colours interwoven with a unique black patina, making every fence a distinctive original with an endless lifespan. The entire system is completed with caps.

| ID      | Name                           | Dimensions<br>(L/W/H) cm | Weight<br>(kg/unit) | Palletization<br>(units/kg) |

# STONEWOOD BENCHES AND TABLES

NATURALLY  
TEXTURED  
STONEWOOD

Benches and tables in the STONEWOOD system are robust pieces of outdoor furniture, popular for use in parks, forest parks, and private gardens. A major advantage is their maintenance-free nature; their weight makes them tamper-proof, and the material prevents damage commonly seen with wooden elements.
