**GovWare 2025**

21 - 23 October 2025

MINISTRY OF  
INDUSTRY AND TRADE

**mpo.gov.cz**

**Dear business partners,**

You have in your hands a publication that presents Czech companies and their innovations at an important professional event. Participation in such a fair is not only an opportunity for presentation, but also proof that Czech companies have a strong position on the international scene.

In today's dynamic business environment, where technology and trends change rapidly, it is crucial for business representatives to meet and share their knowledge and experience. Trade fairs provide a unique platform for discussion, exchange of ideas and networking between experts and potential business partners.

Our companies undoubtedly have a lot to offer. They actively participate in the creation and improvement of their products and services in accordance with current market requirements. The Ministry of Industry and Trade actively supports Czech companies in their efforts to develop products and services with high added value, which represent the basic pillar of the prosperity of any economy.

The presentation of our products at fairs is an essential marketing tool that allows us to show our customers the quality and level of our technologies. These events allow us to connect with the professional public, establish new contacts and share our visions.

Our goal is not only to sell products. Participation in this fair provides us with a unique opportunity to establish strategic partnerships and technological cooperation. We are looking for partners and subcontractors with whom we can jointly develop innovative projects that will bring us mutually beneficial cooperation.

I would like to wish you many successes and inspiring meetings at this exceptional event, which is an opportunity to grow and collaborate in the ever-evolving business world.

**Minister of Industry and Trade**

# Blindspot

**blindspot.cloud**

## Who we are:

Blindspot Technologies is an independent Czech cybersecurity vendor focused on keeping critical online services available. Our team of network engineers and threat researchers spent the last decade building carrier-grade defenses and operating scrubbing for banks, telcos, and the public sector worldwide. We design for zero-downtime operations and full transparency - you see what we see, with clear reasoning behind every mitigation and no black boxes.

## What we do:

We deliver Cyber Resilience Service, combining 24/7 monitoring, automated DDoS mitigation, bot management, keyless web-application protection, traffic analytics and regular security testing into one managed offering. Activation is simple; detection and mitigation happen in seconds; and you never share SSL/TLS keys. You gain live telemetry, clear, audit-ready reports, and a managed runbook that integrates cleanly with your existing stack.

## Who/what we look for:

At GovWare we want to meet organizations that cannot afford downtime - banks, payment processors, cloud providers, gaming platforms, critical-infrastructure operators, and national networks - as well as value-added resellers, MSSPs and telcos. Bring one critical path like payments or an API; we'll run a five-minute resilience check or a live drill, showing how we stop carpet-bombing and slow-burn attacks without user impact before customers even notice.

## Who to contact:

**David Cermak**  
CEO & Founder

**goodaccess.com**

#### Who we are:

GoodAccess is a cloud-based cybersecurity platform (SASE/SSE) that enables medium-sized businesses to easily implement Zero Trust Architecture (ZTA), regardless of infrastructure complexity. Using a low-code/no-code approach, it can be deployed within hours or days, without requiring in-house IT expertise. The platform integrates seamlessly with both SaaS/cloud applications and legacy systems, securing critical assets for remote and hybrid workforces. GoodAccess serves organizations with 50–5000 employees across multiple industries, especially those operating in multi-cloud and SaaS environments.

#### What we do:

GoodAccess unifies customer infrastructure under a single Zero Trust security umbrella. Core capabilities include:

- Secure remote access and BYOD (device inventory, posture checks)
- MFA for all critical systems, including legacy apps
- Identity-based access control (IAM/FWaaS, SSO, SCIM)
- Network segmentation and encryption to minimize attack surface
- Full visibility and control (logs, reporting, SIEM integration)

#### Who/what we look for:

Partnership with APAC Managed Services Providers (MSP) / Managed Security Services Providers (MSSP), Value Added Distributors (VAD) enabling us to deliver our solution in the APAC market.

**hackedlist.io**

### Who we are:

HackedList.io was founded by two cybersecurity professionals with extensive experience in penetration testing, threat intelligence and cyber risk management. Before launching HackedList.io, the co-founders worked in top global consulting firms, including Deloitte and PwC, where they specialized in investigating cyber incidents, securing enterprise networks, and advising Fortune 500 companies on cybersecurity strategy.

### What we do:

Every day, malware-infected endpoints generate massive amounts of compromised credentials that are resold and weaponized in new breaches. Without continuous monitoring, organizations have no way of knowing that their digital front door has already been opened to attackers.

HackedList.io solves this problem with superior breach intelligence focused on compromised credentials. Through rigorous data sanitation processes, we eliminate false positives and duplicate records, ensuring you receive only actionable alerts. Our advanced automation technology continuously harvests data from exclusive darknet sources inaccessible to competitors, combined with hands-on expert verification of critical breaches—providing you with the most comprehensive and reliable threat intelligence for protecting your digital assets.

In addition, HackedList.io offers a free public search tool on its website, enabling anyone to quickly check whether login credentials from their domain or email have been compromised and are being traded online. It's a simple and registration-free way to gain visibility into potential security risks.

### Who/what we look for:

We are looking for MSSPs and cybersecurity firms to partner with us and deliver darknet intelligence directly to their clients.

**myq-solution.com**

### Who we are:

For the past 30 years we've been making scanning and printing easy and affordable for everyone. With operations in more than 150 countries around the world, we have secured and streamlined processes on more than 1 million printers through our extensive network of certified partners.

### Who/what we look for:

Join us on this journey and let us bring the latest trends in printing, scanning and document processing to your office.

### What we do:

We have eliminated unnecessary bureaucracy for our customers, protected their corporate know-how and made printing, scanning and document processing more convenient, accessible, and resilient for more than 50 million users.

# safetica

**safetica.com**

## Who we are:

Safetica is the Intelligent Data Security company. We help organizations in over 120 countries protect sensitive data, uncover insider threats, and ensure compliance—without disrupting how teams work. Our AI-powered platform unifies data protection, discovery, insider risk management, and compliance into one adaptive solution built for hybrid environments.

## What we do:

We deliver contextual, adaptive, and AI-powered data security. Safetica safeguards data across endpoints and the cloud by understanding how data is used—not just what it contains. Our platform provides real-time classification, insider threat detection, and automated compliance enforcement. It's everything traditional DLP isn't: fast to deploy, low-friction, and built for lean teams.

## Who/what we look for:

We're looking to connect with CISOs, IT leaders, partners, and tech-forward organizations in regulated industries—especially those with mid-sized security teams managing data risk across cloud and endpoint environments. Ideal collaborators are those looking to replace legacy DLP, extend cloud data visibility, or embed security within modern workflows.

**wultra.com**

### Who we are:

We empower banks and fintech to build secure digital applications.

### Who/what we look for:

To raise brand awareness in Singapore and find new clients, mainly from the banking and financial sector.

### What we do:

Wultra equips banks and fintech companies with a seamless, post-quantum authentication solution that fortifies security while ensuring a smooth transition. Powered by quantum-resistant cryptography, our developer-friendly technology delivers bulletproof security and a passwordless user experience while complying with global regulations. Trusted by financial institutions worldwide, Wultra's solutions meet stringent standards while offering superior protection against evolving cyber threats.
