forsolution

FORSOLUTION CZ s.r.o. is a privately owned company with expert knowledge and experience within audio surveillance technologies for covert applications. We design, develop and manufacture specific wireless digital audio surveillance equipment for police, intelligence agencies, special forces and other government approved organization's worldwide.

DELTA is an advanced wireless digital audio surveillance system designed for use in covert operations.

A basic setup consists of a 400 mW DELTA transmitter and a DELTA receiver. The receiver is used to listen to live stereo audio from DELTA transmitters and to remotely control DELTA transmitters. Live audio from DELTA transmitters can be optionally recorded in the receiver. DELTA BlackBox receivers can be used for remote access via IP.
